Career Objective

B.Tech graduate with practical experience in Machine Learning, Deep Learning. Skilled in Java FullStack , predictive modeling, and building intelligent agents through real-world projects. Seeking an entry-level Java FullStack role to apply my skills and deliver impactful, software-driven insights.

JAVA FullStack Intern

SocialPrachar - July 2025 – Present

- Working on real-world projects in WebPage Developing, Web Analysis.
- Building predictive models and data-driven solutions using Java and FrontEnd libraries.
- Supporting Web insights through FrontEnd and BackEnd visualization..

Skills

Programming Languages	: Java , HTML5 , CSS3 , JavaScript .
Frameworks Developer	: ReactJS , Spring Boot.
Tools	: MS Excel, VS Code, Eclipse, Canva.
Productivity Tools	: MS Office (Excel, Word, PowerPoint), GitHub

Education

B-tech in CSE(AI ML)	Graduated: 2025
St.Mary's Groups of Institution, Guntur (2021-2025)	CGPA: 7.32%
Intermediate	Graduated:2021
Sri Chaitanya Junior College (2019-2021)	CGPA: 86.7%
Board of Secondary Education	
Graduated:2019	
Sri Sai EM School(2018-2019)	CGPA: 9.5 / 10

Projects

Drug Tracing in Health Care Supply Chain Using Distributed Ledger Technology | HTML, CSS, JavaScript, Python January 2025 – April 2025

- Designed and implemented the Drug Trace Application with real-time operations, The main goal of this project is to improve the efficiency in the health care supply chain by using distributed ledger technology
- Existing systems are mainly build on IOT systems and NFC (Near-Field communication) tags technologies.

In this proposed approach, a decentralized database is used to store information about the drugs and their jour across the supply chain. The information is stored on a distributed ledger, which means that it is not controlled by any single entity, but rather by all the participants in the network. The Ethereum smart contract is used to update the database with information about the drugs as they move through the supply chain. The IPFS (Inter-planetary file system) hashes are used to store images related to the drugs

Certification And Training

- JavaFullStack – SocialPrachar (2025): Completed practical case studies involving Webpage Desinging, Web Development, dashboards, and presentations
- Fullstack Web Development Bootcamp & Hackathon
- St. Mary's Group of Institutions, Guntur & Brainovision Solutions India Pvt. Ltd
- Participated in a 2-day bootcamp and 24-hour hackathon focused on fullstack web development.

Soft Skills

- Communication with Critical Thinking
- Fast Learner with High Adaptability
- Collaborative Team Player with Strong Communication Skills
